PROFESSIONAL SUMMARY

- A 7+ years of experience designing and building scalable full-stack and backend systems using **Node.js, Angular, AWS, and serverless architectures**.
- Proven expertise in developing **enterprise IT management portals**, analytics dashboards, and high-performance APIs supporting **cloud, mainframe, and hybrid environments**.
- Strong background in **AWS services** (Lambda, API Gateway, DynamoDB, S3, CloudWatch, SAM) and **CI/CD automation** for production-grade deployments.
- Hands-on experience handling **large-scale datasets** (millions of records), optimizing performance, ensuring security, compliance, and system reliability.
- Collaborative engineer with experience working across **global teams** (UK, US), mentoring peers, and delivering high-impact solutions recognized for delivery excellence.

EDUCATION

Shivaji University, Kolhapur —
Bachelor of Engineering

2018

Computer Science and Engineering

State Board, Maharashtra — HSC

2014

Science

State Board, Maharashtra — SSC

2012

EXPERIENCE

Ensono Technologies LLP, Pune —
Senior Software Engineer

MAY 2023 - PRESENT

- Enterprise application development using Angular, Node.js, and AWS; Backend optimization for large-scale data systems
- Cross-region collaboration; Node.js upgrades and performance improvements.

iProgrammer Solutions Private Limited, Pune —
Software Engineer

SEPTEMBER 2022 - MAY 2023

- Serverless backend development using Node.js and AWS SAM
- REST API design and AWS deployments.

Param Business Solutions, Pune — Software Engineer

FEBRUARY 2019 - SEPTEMBER 2022

- API development and serverless deployments on AWS.
- CI/CD automation and production support.

PROJECTS

Client.Ensono.Com (Envision Portal)

Technologies: AWS SAM, NodeJS, ReactJS, SQL, MongoDB, DocumentDB, Amazon Web Services

The Envision Portal is part of Ensono Envision®, an integrated IT management platform designed to enhance visibility, optimize performance, and improve service delivery for clients across mainframe, public cloud, and hybrid environments. The portal provides dashboards for cloud utilization, cost trends, performance metrics, and change management, supporting operations, security, compliance, and service management.

Responsibilities: Designed and delivered end-to-end full-stack features for the Envision Portal, building scalable dashboards, secure APIs, and integrations across mainframe, cloud, and hybrid environments while ensuring performance, compliance, and collaboration across teams.

UtecBuild.com

Technologies: AWS SAM, NodeJS, ReactJS, SQL, MongoDB, DocumentDB, Amazon Web Services

Utec by UltraTech is a hyperlocal digital platform that delivers end-to-end home building solutions to home builders through a single interface. The application is developed using ReactJS on the front end, NodeJS with AWS SAM architecture on the back end, and is deployed on Amazon Web Services.

Responsibilities: Designed, built, deployed, and secured serverless backend services and REST APIs on AWS while collaborating with frontend teams to deliver scalable end-to-end features.

MoneySpring.in

Technologies: Serverless, NodeJS, ReactJS, Amazon Web Services, SQL, NoSQL

MoneySpring is an online platform for financial investments in Mutual Funds. The application is developed using ReactJS on the front end, NodeJS with Serverless architecture on the back end, and deployed on Amazon Web Services.

Responsibilities: Developed and deployed scalable Node.js APIs and serverless AWS solutions, automated CI/CD pipelines, integrated databases, optimized performance, and collaborated with stakeholders to deliver reliable applications on time.

SKILLS

AWS (Lambda, SAM, EC2, code commit, Code deploy, Batch, Code Build, Code Pipeline, S3, RDS, DynamoDb, IAM, Cognito, WAF and Shield, Route 53, Cloud front, VPC, API Gateway, Cloud watch, Cloud formation, SQS, SNS, Certificate manager, etc).

GCP (Firebase, Storage, Authentication, Firestore, IAM and Admin, Cloud Functions, CloudRun, CloudScheduler, CloudSQL, etc).

NodeJS

AngularJS

ReactJS (GatsbyJS)

Javascript

SQL

NOSQL

Redis

Snowflake

MongoDB

GIT

HTML, CSS
